JOHAN GRILLON

IT & CYBERSECURITY

Auckland, North Shore | +64 21 171 6242 | grillon.johan@gmail.com
linkedin.com/in/johan-grillon-cyber | johan-grillon.github.io

PROFESSIONAL PROFILE

Career changer moving into IT and cybersecurity, with a background in electrical work, technical field service and small-business management. Holds CompTIA A+, Network+ and Security+ and is working towards the EC-Council CEH. Brings systematic fault finding, customer communication and experience delivering technical installations from drawings and documentation.

Seeking an entry-level role in IT support, networking or cybersecurity in Auckland. Keen to contribute practical problem-solving skills, learn from experienced colleagues and keep developing technical skills. Also interested in internships and job shadowing to gain insight into professional IT and security work.

CERTIFICATIONS & EDUCATION

CompTIA A+ - January 2026 | **Network+** - March 2026 | **Security+** - May 2026

EC-Council CEH - studying towards certification

French electrical qualifications - NZQA assessed at Level 4

CORE SKILLS

- **Technical documentation:** interprets technical drawings, wiring diagrams and manufacturer instructions to carry out installations and investigate faults.
- **Electrical, home automation and alarms:** complete installations from cabling and equipment installation to configuration, testing and commissioning; home automation projects in France and New Zealand.
- **Fault finding and technical service:** professional troubleshooting, prioritisation, escalation, independent site work and coordination with customers, suppliers and other trades.
- **Systems and support:** Windows and Linux fundamentals; personal Windows installation and troubleshooting; regular macOS use and Microsoft 365 end-user experience.
- **Networking and security foundations:** TCP/IP, IPv4 addressing and subnetting, DNS, DHCP, Wi-Fi, routing/switching fundamentals, security controls and introductory vulnerability-assessment concepts through CompTIA study.
- **Scripting and documentation:** developing Bash, PowerShell and Python fundamentals; records commands, troubleshooting steps and lab results in Obsidian.

IT DEVELOPMENT & PRACTICAL TRAINING

Full-time IT and cybersecurity study | November 2025 - Present

- **Personal virtual lab:** creates and uses virtual machines, including Kali Linux and Metasploitable 2, to practise scanning, enumeration and exploitation in an intentionally vulnerable training environment.
- **Guided training:** TryHackMe, Hack The Box Academy and EC-Council labs covering Windows/Linux, networking, packet analysis and web application security. Tool practice includes basic personal Nmap use and guided use of Wireshark, Burp Suite and Metasploit.

IT & Cybersecurity

PROFESSIONAL EXPERIENCE

Frenchy's Crepes | Business Co-owner & Operations Manager

Takapuna, Auckland | December 2023 - October 2025

- Managed purchasing, suppliers, stock, administration, regulatory requirements and customer service.
- Resolved operational and equipment problems, prioritised issues and coordinated external support.

Team Cabling Ltd | Electrical Contractor

Auckland | 2023 - 2024

- Completed residential and commercial electrical installation, fit-out, wiring and switchboard work.
- Worked independently and alongside other trades to New Zealand electrical standards.

Sona Air Ltd | Senior Electrician

Auckland | September 2020 - June 2023

- Diagnosed electrical and control faults across commercial sites, working with HVAC technicians to investigate equipment issues.
- Coordinated technical work and communicated findings with customers and other trades.

Ciela Village / La Farigoulette | Technical Manager

France | February 2019 - June 2019

- Coordinated and prioritised maintenance, technical purchasing and external contractors across a large holiday resort.

BIO Habitat | Regional After-Sales Field Technician

PACA Region, France | September 2012 - December 2018

- Travelled independently between customer sites to diagnose and resolve electrical, electromechanical and general equipment faults.
- Planned routes, prepared parts and tools, managed vehicle stock, communicated findings and escalated complex issues.

Earlier Electrical & Maintenance Experience

France | Multiple employers and self-employment | 2004 - 2012

- Built practical experience in fault finding, customer service, electrical installation, technical drawings and workplace safety.
- As owner of Grillon Eco Elec, managed quotes, invoices, purchasing, scheduling and customer-site work.
