PROFESSIONAL PROFILE

CompTIA A+, Network+ and Security+ certified career changer seeking a first opportunity in IT support, infrastructure or cybersecurity in Auckland. Brings more than 20 years of electrical troubleshooting, technical field service and customer support, including prioritising urgent problems and explaining practical solutions.

Developing systems, networking and security fundamentals through CEH studies and practical labs. Offers established customer communication, problem-solving and operational skills, with an interest in cybersecurity awareness and education. Keen to contribute to a technical team, including in organisations delivering essential services.

CERTIFICATIONS & EDUCATION

CompTIA A+ - January 2026 | Network+ - March 2026 | Security+ - May 2026

EC-Council CEH - studying towards certification

French electrical qualifications - NZQA assessed at Level 4

CORE SKILLS

• Troubleshooting and field service: systematic fault finding, prioritisation, escalation and independent site work; coordination with customers, suppliers and other trades.

• Systems and support: Windows and Linux fundamentals; personal Windows installation and troubleshooting; regular macOS use and Microsoft 365 end-user experience.

• Networking and security foundations: TCP/IP, IPv4 addressing and subnetting, DNS, DHCP, Wi-Fi, routing/switching, security controls and introductory vulnerability assessment through CompTIA study.

• Customer communication: understands customer needs, explains technical faults and options in accessible language, and communicates with people from varied backgrounds.

• Operations and documentation: scheduling, purchasing, stock and administration; interprets technical drawings and manufacturer instructions for installations and testing.

• Developing skills: Bash, PowerShell and Python fundamentals; records commands, troubleshooting steps and lab results in Obsidian.

PROJECTS & PRACTICAL LEARNING

IT and cybersecurity study | Since November 2025

• Personal virtual lab: uses Kali Linux and Metasploitable 2 virtual machines to practise scanning, enumeration and exploitation in an intentionally vulnerable training environment.

• Guided learning: TryHackMe, Hack The Box Academy and EC-Council labs covering Windows/Linux, networking, packet analysis and web security. Practice includes Nmap and guided use of Wireshark, Burp Suite and Metasploit.

• Digital confidence guide — in development: planning and editorial development of accessible guidance for older adults and people less comfortable with technology. Topics include account protection, scams, phishing and responding to suspected incidents. Not yet published.

IT & Cybersecurity

PROFESSIONAL EXPERIENCE

Frenchy's Crepes | Business Co-owner & Operations Manager

Takapuna, Auckland | December 2023 - October 2025

- Managed purchasing, suppliers, stock, administration, regulatory requirements and customer service.
- Resolved operational and equipment problems, prioritised issues and coordinated external support.

Team Cabling Ltd | Electrical Contractor

Auckland | 2023 - 2024

- Completed residential and commercial electrical installation, fit-out, wiring and switchboard work.
- Worked independently and alongside other trades to New Zealand electrical standards.

Sona Air Ltd | Senior Electrician

Auckland | September 2020 - June 2023

- Diagnosed electrical and control faults across commercial sites, working with HVAC technicians to investigate equipment issues.
- Coordinated technical work and communicated findings with customers and other trades.

Ciela Village / La Farigoulette | Technical Manager

France | February 2019 - June 2019

- Coordinated and prioritised maintenance, technical purchasing and external contractors across a large holiday resort.

BIO Habitat | Regional After-Sales Field Technician

PACA Region, France | September 2012 - December 2018

- Travelled independently between customer sites to diagnose and resolve electrical, electromechanical and general equipment faults.
- Planned routes, prepared parts and tools, managed vehicle stock, communicated findings and escalated complex issues.

Earlier Electrical & Maintenance Experience

France | Multiple employers and self-employment | 2004 - 2012

- Built practical experience in fault finding, customer service, electrical installation, technical drawings and workplace safety.
- As owner of Grillon Eco Elec, managed quotes, invoices, purchasing, scheduling and customer-site work.
